

Groceries Product Designer Role (L3)

About Gojek

Gojek is the largest consumer technology company in Indonesia, the world's 4th largest market by population. With over 25 million downloads, the Gojek app has become the leading transport, payments, food, courier, and hyperlocal shopping app in the country.

Gojek has a unique entrepreneurial environment, spanning multiple products. If you're an independent thinker and all-rounded person, this is the place for you. We are looking for awesome talent ACROSS LEVELS to be part of the talented Gojek family.

Gojek is an excellent team because of the diverse backgrounds of our staff. In keeping with our beliefs and goals, no employee or applicant will face discrimination/harassment based on: race, color, ancestry, national origin, religion, age, gender, marital domestic partner status, sexual orientation, gender identity, disability status, or veteran status. We sincerely encourage women, minorities, and people from underrepresented backgrounds to apply.

Groceries overview

Groceries is Gojek's newest product group which includes two products, GoMart, where we deliver on-demand fresh and packaged daily staples to our users by partnering with the best merchants in each city and GoFresh, which is a Managed Marketplace that optimizes supplies for GoFood merchants through a curated network of suppliers, logistic providers and fulfillment operators for their daily ingredients and consumable needs.

We welcome people from all backgrounds who seek the opportunity to help build a future where everyone and everything can move independently. If you have the curiosity, passion for technology, and collaborative spirit, work with us and let's solve a wide range of problems with technology and make a large impact on millions of users.

The Groceries Design Team is dedicated to making grocery shopping effortless for everyone and finding solutions to large-scale challenges that will forever change the way people feed themselves and their loved ones.

About Position

We are looking for a **product designer** to help us create and shape unique, user-centric experiences for our customers, shoppers, drivers and retailers. You'll partner with research, product, data science, engineering, and content strategy to identify new opportunities, create and test concepts, and deliver end-to-end solutions that are functional, usable, and delightful.

As a Product Designer, you will be

- Working with UX researchers to identify users' needs and understand how users consume and navigate all the way through the application.
- Planning and designing wireframe/flow for any project/feature they are working on.
- Come up with ways to validate the design, and collaborate with the Research and Insight team to execute it.
- Collaborate and coordinate with Interaction designers, copywriters, creative, business, stakeholders and engineering to deliver user-centric solutions.
- Setting up UX frameworks to help other designers work efficiently.
- Ensure that all projects are delivered in a timely manner.
- Measuring and iterating the product that you develop once it's live related to product OKRs. Working with research and data team to measure the KPIs that helps us determine the dataset we should be measuring to determine the success.
- Working closely with the engineers, we go through a series of daily/weekly stand-up and QA to make sure our solution is on track with the design and bug-free.

Requirements

- 3+ years of working experience in the Product design domain along with relevant education(Engineering, Design, HCI, Psychology, or a related field).
- Fluency in the latest product design trends, tools and technology across platforms.
- You must provide a link to your well structured portfolio showcasing problem solving skills and high design caliber.
- You're a fast learner, you're comfortable teaching yourself new skills and can thrive in a complex and fast-paced environment. Ideally working on consumer-facing, large-scale products.

- Analytical and data-driven. Understanding of some analytics tools such as excel, google data studio, CleverTap, etc are nice to have.
- You're empathetic and passionate about your customers and always bring questions back to what will serve them best.
- You are detail-oriented while being able to see the big picture.
- You're fluent in English and are a clear and adept communicator in person, in writing, and over the phone/web conference.
- You make a great thought partner with the agile and cross-functional teams.
- Not afraid to get your hands dirty to find out the root cause of an issue, or to validate your design, either through quantitative or qualitative research
