PROJECT DARCI

Decider	Sharon Widjaja
Accountable	Nurfitriyana Riyadi
Responsible	Nurfitriyana Riyadi
Consulted	Diah Ismiyanti
Informed	Chethan Kumar, Vipul Saxena, Hana Clarinda

BACKGROUND

Given the availability of shoppers and a wide range of new merchants in the platform, GoMart sees the need to develop an additional rating feature for these partners in the ecosystem. This feature shall allow customers to not only review and give feedback to drivers, but also to shoppers, merchants, or even the overall order when necessary. Ideally, it shall also trigger issue resolution or troubleshooting when the rating is low.

With the lack of insights about how customers rate parties involved in the grocery order, this research is intended to garner the understanding around the topic, to support the product development process.

BUSINESS OBJECTIVES

Build in-app review system for consumers to rate SKU quality and receive reviews from 20% of monthly COs.

RESEARCH OBJECTIVES

1. To understand how customers rate/review GoMart order, including all parties involved (i.e. shopper and merchant).
2. To understand the factors/reasons and expectations that are considered when customers give certain ratings/reviews.

RESEARCH QUESTIONS

1. How do customers give rating/review after each order in the app?
 - a. When do they usually fill in the rating?
 - b. What do they think of the act of giving a rating? What does it mean to them?
2. What are the factors/reasons that they consider when giving ratings to the overall order, shoppers, and merchants for each star (i.e. 1-5 stars)?
3. What do they expect from giving such a rating?

HYPOTHESES

TBA

RESEARCH OUTPUT

Suggestions on what to build for GoMart's shopper and merchant rating MVP feature; where and when to display the rating after order, consideration/reason pills for each rating.

METHODOLOGY AND PARTICIPANT

Methodology

Phase 1: Desk Research

Benchmarking against competitors; how do they display their in-app rating features, and against internal CSAT attributes, to determine the hypothesized factors/reasons for in-app rating.

Phase 2: Remote In-Depth Interview, with Card Sorting

Probe customers' behaviour, consideration, and expectations when giving rating in the app.

Competitors for Desk Research

HappyFresh and GrapeMart

Participant Criteria for Remote IDI

- Customers residing in Jabodetabek.
- Have made at least 1 GoMart CO in the last 30 days.
- Have at least an experience ordering groceries online from other apps: HF, GrapeMart, Sayurbox, and/or e-commerce in the last 30 days.
- Segmented into groups as follows. Participants will be mutually exclusive.

Segment	Criteria	# Participant
Have complaint	Customers have submitted a CCU ticket for their GoMart order in P3M.	3
Have no complaint	Customers have never submitted a CCU ticket for their GoMart order in P3M.	3
Total		6

TIMELINE
