

Groceries H1 2021 OKRs - Final

North Star: Increase Monthly Transactions to 2 Mn (~ 66 k/day) by June 2021 (vs. ~1.3 M in Dec 2020)

Focus: Reliability, Consumer acquisition (Routine buy), Brand building

Context on overall plan

[Overview](#)

[Initiatives Charter - Asana](#)

Objective 1: Reduce friction for routine buying usecase (Acquisition)

Rationale : Most of our existing consumers are currently looking for daily needs / incidental goods with a limited market segment. In order to scale our numbers, we will need to target routine buyers for their weekly grocery items.

	Key Result	Responsible	Share with	Major Initiatives
1.1	Increase % CO's from supermarket stores from ~10% to 40%	PIC: Dennis Support: Yoel, Joan, Fitoy	Marketplace, Consumer platform	- Fine tune targeting and segmentation to optimize for acquisition - Demand generation experimentations to optimize for activation rate for new users - Cross functional collaborations with different products to increase visibility of GoMart within gojek platforms: gofood plus, goclub, gopay alfa - Missions experiment: cross sell mission, social mission - GoMart Promo Tool improvement: Adding new promo use cases - Provide visibility to supermarket stores Possible Product initiatives: - Subscriptions - Missions/goals

				- Order scheduling Auto re-order for monthly - Payment widget in GoMart (Paylater / CC/ DC) - Shopper SOP for larger size orders - Multi Fleet for large orders ? -- possible in H1? - SKU bundling Promo/discount for these bundles - SKU suggestions based on SKU groupings - donebaskets - Referrals ?
1.2	Increase AOF (Buying Freq) from 1.2 to 2.0 per month	PIC : Sharon/ Tarun Support: Dennis	Marketplace, Consumer platform	- Missions - Reorder feature: favourite skus - Shopping list - Multicart - Collaboration with GoFood+ subscription - Demand shaping: multiple vouchers, routine monthly campaigns (e.g payday, etc) - GoClub - Segmented/Personalised Banner
1.3	Increase outlets on gomart from 1500 to 4000 (from list of merchants , focusing on supermarket & specialty stores) only in serviceable areas	PIC: Joan Support: Chethan	Sales, Merchants	- Reevaluate onboarding. Improving 3 stages of onboarding : - pitch to sign : improving coordination sales and GoMart team with standardized flow and clear direction - sign to registration on platform : improving integration between platforms - registration to live : improving operational capacity to scale onboarding more merchants - Improving hygiene features that increase likelihood of a merchant joining us. (Such as : - EIM integrations with supermarket merchant

				- Weight feature for fresh produce - Shelf life, freshness - Different units of measurement - Merchant reporting - SLA, demand forecasting, Order details, Competitive intelligence etcShopper App
--	--	--	--	---

Objective 2: Create a reliable & consistent experience for consumers

Rationale : Grocery delivery is usually done only 2-3 monthly by our target segment. Ensuring they have a great experience is critical in order to maintain them on our platform.

	Key Result	Responsible	Share with	Major Initiatives
2.1	Maintain BCR above 88% <i>~80 % in Dec 2020</i> <i>Reliability</i>	PIC: Amar Support: Chethan	Marketplace, Driver Platform and Ops	- Jaeger implementation - Shopper management Shopper App - Driver App enhancements - Shopper - Consumer comms - OMS integrations using EIM - Surge pricing Sauron ? - OOS exception handling (SKU replacement etc) - Merchant dashboard with SLA adherence and other actionable insights
2.2	Maintain fill rate (order level) of more than 95% <i>96% in Dec 2020</i>	PIC: Chethan Support: Amar, Joan	Merchants	- EIM, API integrations and near real time integrations to ensure SKU availability - Inventory forecasting based on category - Continued enhancements to SKU sync/integrations with merchants - Enable shoppers to update inventory in real

	<i>Accuracy</i>			time based on what they see at the outlet - Enable merchant's in store personnel to update inventory at outlet level for specific SKUs if required
2.3	Build in-app review system for consumers to rate SKU quality and receive reviews from 20% of Monthly COs <i>Quality</i>	PIC : Sharon Support: Amar, Arunima		- Shopper perception - Apology vouchers - Inventory gradation process - Brand health tracker - In -App review system - Merchant SOP review
2.4	Increase number of of SKUs available to an average consumer in serviceable area from 5,837 to 8,000 SKUs (8000 is ~70% of list of master SKU from Dec'20) <i>Completeness</i>	PIC: Joan Support: Amar		- Improving operational capacity and speed of onboarding SKUs - Enlarge master content catalogue by liaising with brands - Increase operational bandwidth to measure dimension and providing SKU images - Building SKU scrapping features in CMS - Maximise merchant discoverability in serviceable areas - Onboarding remaining outlets from existing merchants to cover more areas - Increase merchant discoverability radius without jeopardizing level of service
2.5	Increase weekly Visit-to-Book conversion (unique users) from 16% to 25% <i>Personalization</i>	PIC: Sharon Support:		- Favourite Merchant - Merchant Page Improvement - ML based search relevancy - Smart Recommendations - Promo targeting - Flash sales/promos

2.6	Maintain promo abuse booking ratio in GoMart below 3% of monthly COs <i>5.70% in December 2020</i> <i>Fraud</i>	PIC: Chethan Support: Dennis	Risk	- Monitoring Dashboard & Alerting - Allow/disallow voucher redemption at specified merchants - Nullifier on OMS - Restricting cash orders for suspicious users - Bouncer rules - Build Rules and Limiter on GoMart Promotion Tools
-----	---	--	------	---

Objective 3: Build a top of mind groceries delivery brand with an attractive value proposition

Rationale : Grocery delivery is starting to be a very competitive landscape throughout the region. In order to be ahead of the competition, we need to build a strong brand with attractive value propositions.

	Key Result	Responsible	Share with	Major Initiatives
3.1	Increase spontaneous recall for routine grocery buying by 20% (as rated by 3rd parties e.g., yougov, nielsen, etc)	PIC: Yoel Support: Arunima	Marketing	- Brand Health Tracking on GoMart Awareness Level and its attributes vs Competition. - Hosted [AOn Brand Campaign] as an umbrella campaign for GoMart 2021 - With 2 thematic campaign during 2 mother's day period in ID. Continuation of Emak2 Campaign in H1 2021. - Leverage brands and external partnership to build offline presence. (i.e. Co-launch activity with supermarkets,)
3.2	Acquire 1.2 Mio new gomart transacting users by end of June 2021	PIC: Yoel Support: Dennis	Marketing	- Execute 6 sales campaigns as a hook for users w/ a tactical promo message.

				- CRM Channels to drive Gojek users and GoMart low hanging fruit target users to enter and browse. - Digital channels to drive traffic and new users. - Exclusive brand promotions only on GoMart to drive brand traffic and customers.
3.3	Contribute 250K USD from Brand funded promo <i>Value for money</i>	PIC: Dennis Support: Yoel, Joan	Brand Partnership/ Commercial	- FMCG Brand Virtual stores - Improving promo platforms and tools: limiter, promo price tiering, bundling, bulk buy - Being able to segment which customer sees what banner on gomart

Objective 4: Scale efficiently with reliable systems and processes

Rationale: As we scale our transactions and add on additional merchants/ SKUs, automating key tasks will be important to maintain our operation expenses and maintain our reliability.

	Key Result	Responsible	Share with	Major Initiatives
4.1	Achieve 99.98% uptime (<i>Max downtime of 8m 45s in a month</i>) with SLI/SLO tracking for 100% of critical flows by, • Partitioning key databases for Orders, Inventory, Catalogue and Promotions • Fallbacks for at least 2 key external dependencies	PIC : Aroj Support: Bakti, Vivek, Gaurav		- Scale Inventory/Catalogue systems and Discovery/Search as we onboard more merchants and grow user traffic. The expected volume of data is in the order of 100s of millions - Move to a partitioned database for 2 key services to achieve better performance at higher scale of traffic and data. • Marvin Orders, Inventory and Catalogue • Lollipop Outlet promotions - Achieve higher availability by implementing

	Availability			below initiatives to reduce impact of downtime due to external service failures. ● Straight Line Fallback for Maps API failures ● Caching for external APIs like Serviceability - SLI/SLOs defined for marvin (OMS) and other critical public APIs ● Push alerts to Lens for internal services to enable SLI/SLO tracking.
4.2	Reduce the cycle time for user stories by 10% by improving overall engineering productivity by achieving below ● Achieve 70% unit test coverage for GoMart consumer app and GoBiz GoMart Module. ● Automate 70% of P0-P1 Gojek App test cases ● Automate 70% of P0-P1 Gobiz App test cases Productivity	PIC : Aroj Support: Bakti, Vivek, Gaurav	Engineering platform team, Merchants	- Cycle time - From Story 'in dev' to 'in production. - Fast Feedback - Faster build times locally and on CI, especially for mobile builds for Consumer App and GoBiz App. - Parallel tests, build optimizations - Reduce QA and FCT time through Automation. - CMS page to do controlled order creation on production - make ops team self sufficient for new merchant/feature rollout - Reduce time for PR reviews - Code quality checks (automated/checklists) - Increased test coverage for mobile. - Refactor the mobile architecture to make it a lot more simpler, maintainable and testable.
4.3	Increase self serve from merchants /brands to manage their catalogues (all content related	PIC: Chethan	Merchants	- EIM integrations for Inventory, outlet status sync - Enhancement to GoBiz dashboard SKU, outlet

	tasks) from 20% to 80% <i>Automation</i>	Support: Joan, Amar		status sync - Enable SKU onboarding for existing merchant - Merchant and SKU performance dashboard, alerts - Simplify/automate merchant onboarding aspects

H2 2020 OKR Metabase : <https://metabase.golabs.io/dashboard/5362>

H1 2021 OKR Metabase :

Areas we will not focus on in 2021

Features and issues deemed potentially important for consumers and business but we will not be a focus for 2021 in order to prioritize better:

	<i>Areas</i>	<i>Rationale</i>
1	Launching in International markets	We are still relatively small in Indonesia and need to ensure we first get our product market fit and scale nationally before we tackle international markets
2	Fastest delivery time	Research shows that same day vs 1 hour delivery time do not impact consumer experience as much.
3	Handling Returns / Refunds	More relevant for Electronics + Fashion
4	Merchant memberships	Not enough bandwidth
