

The Studio Accelerator

5 mins

ENGAGEMENT PLAN

Tactical acceleration of key initiatives through short-engagement design sprints and brainstorming sessions.

DELIVERABLES

Build an experimentation pipeline by working directly with teams through a series of engagements to understand their customers and the most important questions to answer.

TESTABLE HYPOTHESES

Why experiments? To make sure we have thought very clearly about how the things we are building are expected to improve results for our customers, drivers, and our merchants.

ANALYSIS & LEARNINGS

Research team presents findings to team plus function leads (Bruce, Alex, Sunita) to identify learnings, refined questions and next steps.

The Studio Accelerator

5 mins

Session 1: – Understand The Problem

Studio: Focus on key questions – reframe these in terms of consumer needs, value, best practices for success

Session 2: Define The Questions We Most Want To Answer

Studio: Design work to turn ideas for alternatives into sketches/mocks

Session 3: Design Experiments To Answer Key Questions

Planning for experimentation: roadmap, timeline, target date for follow-up check point for interpreting the experiments (driven by research)

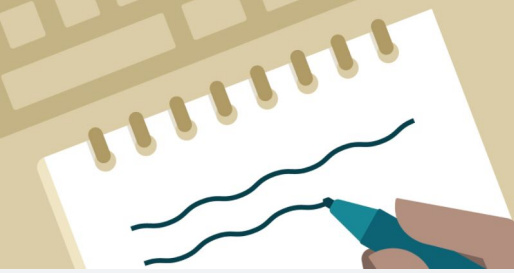

Lightning Talks + Discussion

Talks

- **North Star Vision + The path to the Northstar (15m)**
- **Current Design / UX - A snapshot of where are today (20m)**
 - Current E2E flows / Funnels > including where do people come from and at what stage do they leave again?
 - What is their intent, what are they looking for?
- **Key learnings from August 2020's Design Sprint (10m)**
- **Key consumer insights (15m)**
 - Define TG/ Persona
 - Nation x GoMart Research :
 - Day 1: (including competitor insights?)
 - Day 2: Key insights - a value proposition that motivates consumers to use GoMart routinely
- **Insights from GoFood's pre-booking experience(10m)**

After the talks we'll have a discussion on Key Questions and some initial assumptions (20 mins)

Active Listening & Note-Taking

3mins

NOTE TAKING IN MIRO (or written)

Note taking is required - “no spectators”:

- Write down key words
- Ask “How might we...” (HWM) questions
- Restate what you are hearing in your own words
- Jot down ideas or drawings

We'll use these as reference in the activity at the end.

[Go to Miro](#)

Business statement goals

Improve the discovery experience for [X types of users] on GoMart home page, and increase...

Our visit to book ratio MoM from ~14% in January 2021 to 25% in June 2021. [KR 2.5]

And thus create a reliable & consistent experience for consumers [O2]

Initial* Design challenge for this session

How Might We create a better discovery experience for people who initially want a few items?

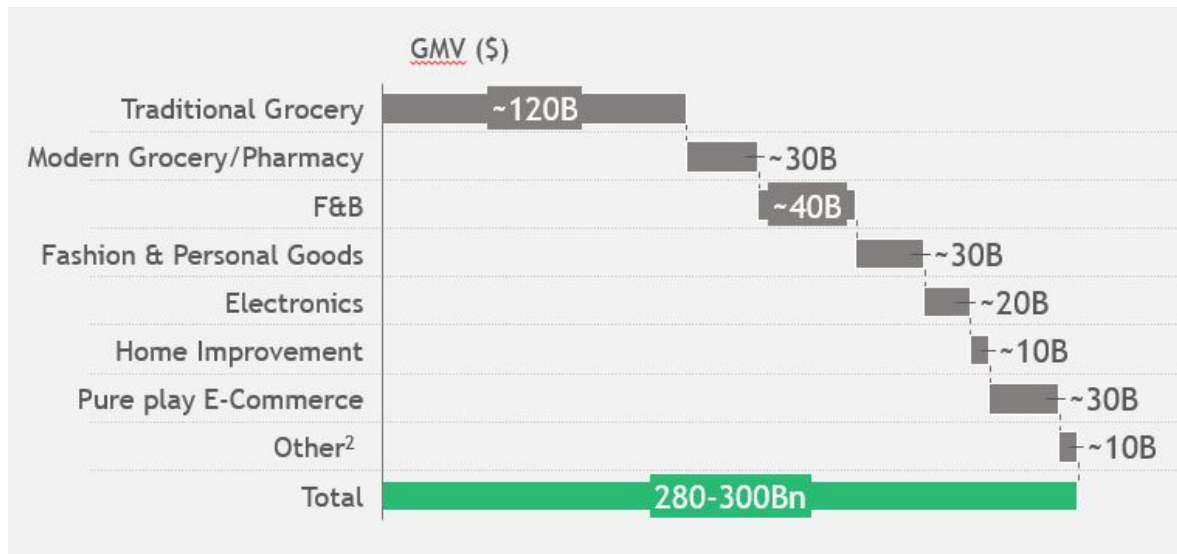

*We'll refine the Design Challenge based on this Session. Aim is to **get into the mindset of a customer.**

Northstar Vision + the path to get there

Tarun

There is a large opportunity in the Indonesia grocery segment with no dominant player yet

Highlights

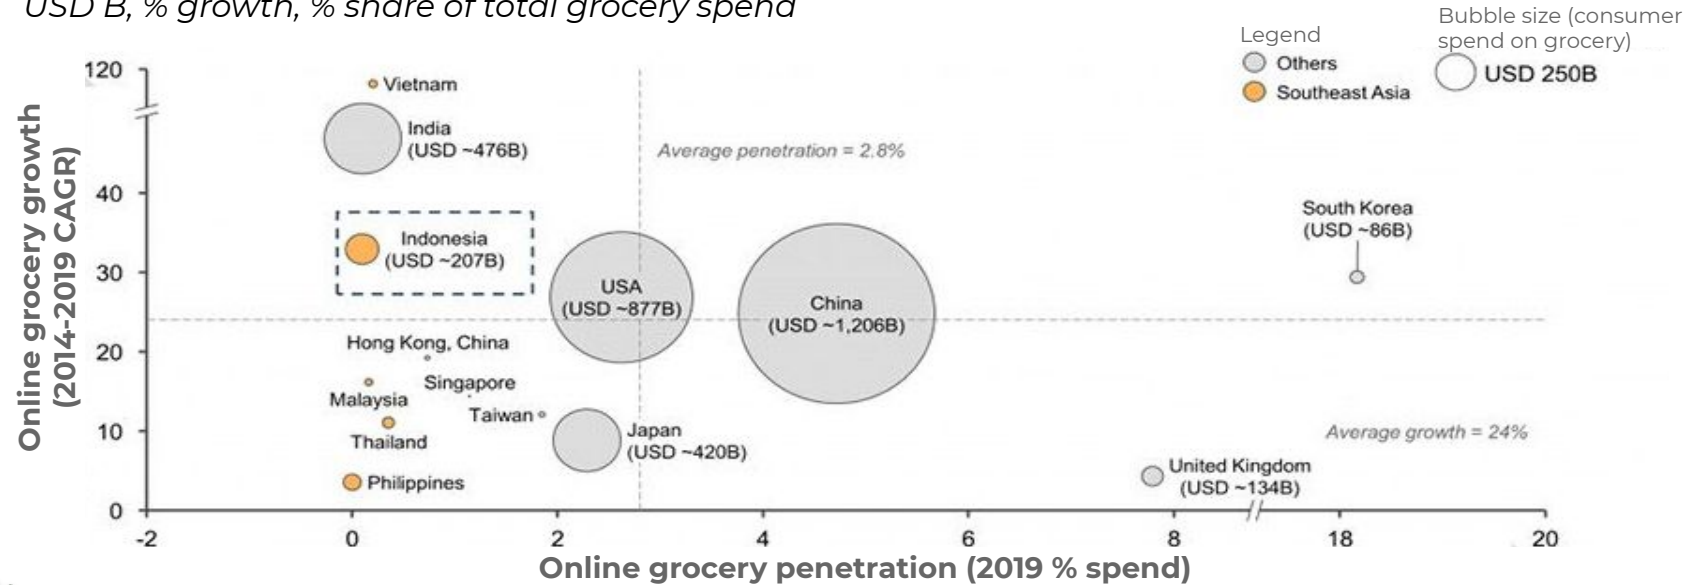

- **Large and growing overall** grocery and daily needs demand in Indonesia
- **No dominant players** in the market with substantial foothold.
- Grocery is **relatively underpenetrated** by online players; online grocery spend <2% of total spend

Substantial upside and growth still exist in Indonesia grocery market

Consumer spending on online grocery, growth & penetration

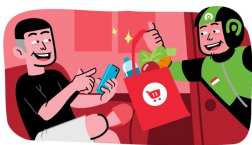

USD B, % growth, % share of total grocery spend

Big market opportunity to be unlocked by facilitating behavior change to increase online adoption of grocery shopping

Build a reliable, easy, efficient online grocery shopping product

On-demand

favorite merchants within *1 hour*!**

Where we want to be:

**Provide a *personalized* and *transparent* experience to
discover and *purchase* groceries**

GoMart's heartland is in 'Efficiency'; the goal is to move to 'Competence'

A closer look at key occasions we need to enter

Efficiency

Competence

Big
purchase

**Weekly
Essentials**

Key SKUs:

Daily use items that may run out
before next big purchase
sauces/condiments, drinks,
shampoo...

Snacks

Chips, chocolate, RTDs

Average basket:
50 - 150 K IDR

Weekly

Sustenance

Restock

Perishables

Key SKUs:

Fresh products

Meat, dried salted fish,
vegetables, fruits, frozen food,
health drink

Average basket:
50 - 150 K IDR

Weekly

Non-Perishables

Key SKUs:

Pantry refill

Milk, honey, snacks

Fresh products

Meat, fish

Home refill

Diapers, mosquito spray

Average basket:
50 - 300 K IDR

Bi-Weekly

**Monthly
Essentials**

Key SKUs:

Kitchen essentials

Rice, sugar, cooking oil

Fresh products

Meat, fish

Home essentials

Personal care, sanitizing
products

Snacks

Bulk snacks, healthy snacks

Average basket:
500 - 800 K IDR

Monthly

Identifying high quality GoMart users: Champion users doesn't depend on promotions

Traits	Universe	Weekly	Monthly	Ad Hoc
# Customers	1.6 Mn	19k	66k	40k
Inorganic / lifetime trx %	29%	3%	4%	5%
Lifetime CO	1	23	12	5
Tenure (months)	1	4	6	10
Average GMV	60k	81k	75k	63k
Average Vouchers	16k	1k	1k	1k
Average GBV	IDR 12k	IDR 13k		
# Unique Merchants (Jabo only)	1	2	2	2

- **Highest spender is actually weekly** with avg GMV 81k.
- Adhoc has less than 1 CO / month but **stay the longest in the platform**.
- Majority purchased from 2 merchants: Alfamart and Alfamidi (97%).

Identifying high quality GoMart users: GoMart Champion Purchase Habit

No.	Universe	Weekly	Monthly	Ad Hocs
1	Cigarettes	Instant Noodles		Milk
2	Cooking Oil	Milk		Instant Noodles
3	Instant Noodles	Chips		Cigarettes
4	Milk	Biscuits		Chips
5	Chips	Snacks		Biscuits
6	Soft drinks	Soft drinks		Soft drinks
7	Biscuits	Chocolate and candies		Mineral water
8	Snacks	Cigarettes		Snacks
9	Mineral water	Mineral water		Chocolate and candies
10	Chocolate and candies	Bread and Cakes		Sanitary pads
Others	29%	16%	21%	31%
Cigarette	70%	69%	62%	59%

Category patterns:

- Universe: buying essentials especially Cooking Oils during promo
- Weekly and Monthly have similar buying patterns.
- Adhocs are using GoMart only for urgent cases (sanitary pads) or probably bulk buyers therefore recency is lower.
- Low diversity of chosen categories by customers

*Recurring Rate for **non-Cigarette** categories*

*Recurring Rate for **Cigarettes** transactions*

How can we build a better consumer experience?

Sophisticated search

Why Most intents are searched rather than discovered

What Relevant search that identifies intent

How

- Learning to rank algo
- Advanced Tagging
- Intent based suggestion

Personalization

Why A lot of consumer don't know what they might want

What Build experiences based on maturity (New, Repeat, Mature)

How

- Relevant merchants
- Recipes
- SKU Recommendations

Delightful experience

Why Consumers don't want groceries to be time consuming

What Minimum clicks to place an order

How

- Onboarding experience
- Seamless post order experience: Shopper chat, etc
- Review systems

Current Design / UX – A snapshot of where are today

Follow this [Miro Board](#) to learn about Pre-booking flow

Key learnings from August 2020's Design Sprint

Vipul

Top voted features were sent for validation

Low
interest

Tested feature	Post UT evaluation
1. Multi-merchant Fulfilment	Double delivery fee & effort in expecting multiple drivers
2. Automatic subscription	Shopping schedule and items change often
3. Shopping list	Not aware of its functionality. New & unfamiliar
4. Barcode scan	Not practical - Users may not have items reference all the time
5. Bulk search	Majority users prefer to search SKU 1 after the other
6. Voice search	Generally indifferent about this method. Only for urgent cases
7. Delivery schedule	This feature is believed as common practice
8. Image search	Not practical - Users may not have items reference all the time
9. Typing search	Most habitual
10. Cross-merchant comparison	Help users to suggest the best possible merchant

High
interest

Key takeaways

TOP DELIGHTS	TOP DISLIKES
 Clean layout ideal for quick checkout	 Unable to see merchants and SKU category in the beginning (homepage / shopping list)
 Ability to see overall basket price comparison between merchants	 Multi-merchant fulfilment

How might we build trust for weekly online grocery shopping in GoMart?

- Seamless UX experience for long-list SKU search
- Guarantee of stock availability
- Selection of merchant: trusted, can cater to all of the user need(wide SKU selection), have good deals
- Safe & Speedy delivery
- Predictable delivery cost
- Expert shoppers

"I usually buy around 10 items every regular shopping time. Using this bulk search, assuming that I can search 5 items in one go, I will only have to search twice to get all the items"
- Nina, 29 yo, Entrepreneur

Key consumer insights(Nation)

Nurfitriyana, Diah and Andrea

Different types of grocery shopping use case.

	1 Routine grocery shopping (A planned, scheduled shopping activity that is done repeatedly in every certain time interval)			2 Ad-Hoc grocery shopping (No regular pattern of time and items are seen)
	Monthly "Big"	Bi-Weekly "Restock"	Weekly and Daily "Fresh"	Ad-Hoc
Overview and Purpose	Stocking up various types of essential SKU at once for a month.	Restocking several items to survive until the next big shopping schedule.	Purchasing fresh produce and ingredients for weekly and/or daily cooking purposes.	Urgent, sudden-out-of-stock at home shopping accompanied by cravings (e.g. snacking, cooking).
Basket Size per Checkout	The biggest in terms of quantity and GMV.	Relatively medium; less than monthly, but can be more or less similar to weekly or even ad-hoc.	Relatively medium; depends on the number of family members and their consumption.	The smallest of all other, but can be bigger due to the cravings (i.e. "sekalian jajan" mentality).
Typical SKU Purchased	Non-fresh; basic staples, dry food, personal care, mom and baby needs, cleaning products, frozen food.	Non-fresh; basically similar to monthly big shopping.	Fresh; fresh meat, vegetables, and fruit.	Non-fresh; can be anything, but most often condiments, snacks, mom and baby needs.
General Needs	One-stop shopping Reasonable to cheap price Good item quality	SKU size variety Reasonable to cheap price Good item quality	Good and fresh item quality Reasonable to cheap price	Stock availability assurance Fast, fast, fast
Online Grocery Needs	Grocery delivery safety Up to H+2 delivery	Up to H+2 delivery	Instant delivery Proper packaging. See details here .	Instant delivery

From a qualitative perspective, there are 3 different routine grocery shopper personas.

These personas are derived from **two dimensions** that **influence customers' needs and considerations** in choosing shopping destination.

THE ANCHORING DIMENSIONS

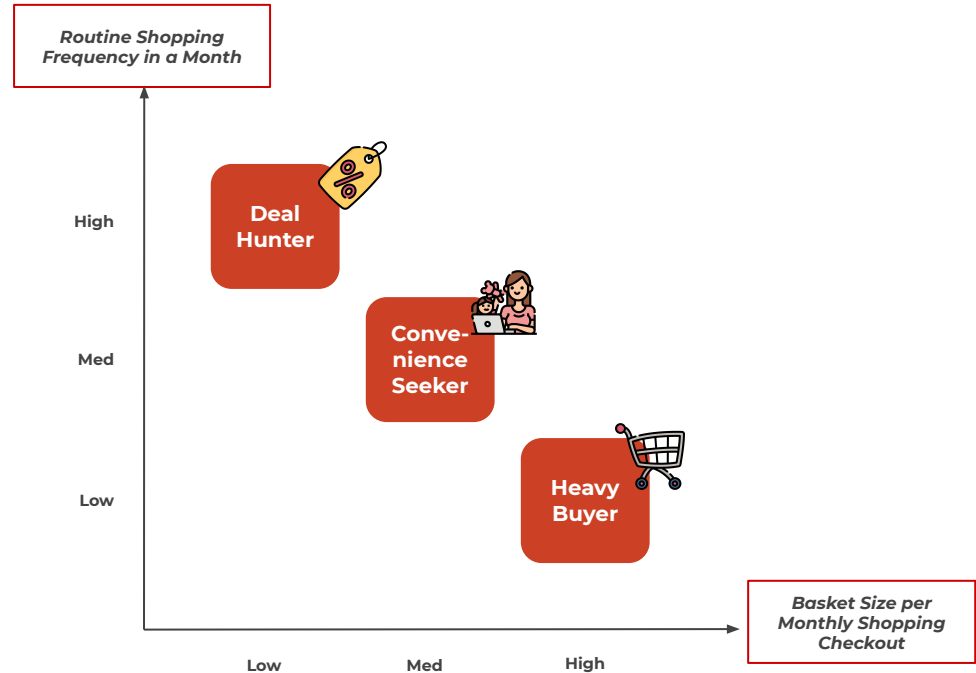

ROUTINE SHOPPING FREQUENCY IN A MONTH FOR NON-FRESH ITEMS

The **overall grocery shopping checkout frequency** done in a month, taking into account the **monthly and bi-weekly*** shopping.

BASKET SIZE PER CHECKOUT FOR MONTHLY BIG SHOPPING

The **overall basket size** (quantity and GMV) **per one time checkout** for the monthly big shopping.

**Weekly/daily shopping is not included, since people have different behavioural pattern in shopping for fresh and non-fresh items.*

Each persona has a unique way to shop for routine groceries.

Heavy Buyers and Convenience Seekers are the all-at-once big shopper when it comes to monthly grocery, while Deal Hunters are the opposite; they tend to split their overall monthly grocery needs into multiple checkouts.

Heavy Buyer

Low Freq x High Basket Size

Convenience Seeker

Med Freq x Med Basket Size

Deal Hunter

High Freq x Low Basket Size

Basket Size per Monthly Shopping Checkout

An abundant amount of items in a single checkout; 2 full shopping trolleys or at least 3-4 cardboard boxes worth IDR 2-3 mio.*

A lot of items in a single checkout; 1 full shopping trolley or 1-3 cardboard boxes worth IDR 1-2 mio.*

Smaller number of items in multiple checkouts; around 1 cardboard boxes worth IDR 200k - 500k per checkout.*

Routine Shopping Frequency in a Month

Overall low non-fresh routine shopping frequency.*

- 1x monthly checkout.
- 1-2x bi-weekly checkout.

Overall medium non-fresh routine shopping frequency.*

- 1-2x monthly checkout.
- 2-3x bi-weekly shopping checkout.

Overall high non-fresh routine shopping frequency.*

- 2-3x monthly checkout.
- 4-6x bi-weekly checkout.

**Based on the pattern that we found in the diary study and qualitative interview.*

Source: [Project Kaimono](#), November-December 2020

Different routine shopping habit affects each persona's needs and where they decide to shop routine groceries from.

Heavy Buyer

Low Freq x High Basket Size

All-at-once big shopper; shop a huge amount of monthly groceries in a single checkout.

Convenience Seeker

Med Freq x Med Basket Size

Need that "hand extension" to execute the one-stop big shopping; offline hassle avoider.

Deal Hunter

High Freq x Low Basket Size

Shop for the monthly big grocery needs in multiple checkouts, for the sake of lower price.

Destination and Consideration

Monthly

Grocery Safety
go offline

"I shop a huge amount of items at once for monthly shopping. I need them to be carried safely to my home, and I have concerns over how the delivery would be if I go online."

This is similar to the findings from [Value Proposition research](#) about trusted delivery method for bulky grocery.

Convenience
use grocery marketplace*

"Monthly offline shopping is such a hassle. I want to still do one-stop bulky shopping from my preferred offline stores, but I need a reliable 'hand extension' to execute it."

Price/Cost
use e-commerce or grocery non-marketplace**

"I want to get overall cheaper price and cost for my grocery shopping."

When shopping in e-commerce, this persona does not mind delaying to buy some items in their monthly shopping list as long as they get more interesting promo.

Bi-Weekly

Personal Safety
use on-demand

Price/Cost
go offline

Personal Safety
use on-demand

Price/Cost
go offline, or use the same app as monthly shopping

Routine Shopping Customer Journey

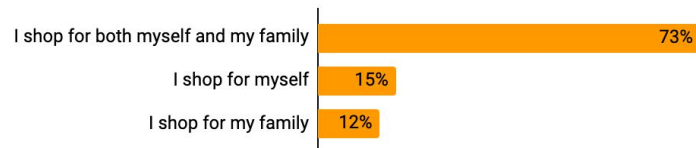

Demographic Profile

Total respondents: 1,564

Level of confidence 95%, MoE 5-6%

- *Gojek's Mature 1 and Mature 2 users in the last 28 days (from 3 October 2020). Based on platform-level user states. See this [document](#) for reference.*
- *Residing in the top 3 GoMart service areas: Jabodetabek, Bandung, and Surabaya, based on the users' lifetime common location.*
- *Have purchased groceries online at least once in around August - October 2020.*

Q: From the statements above, which one best describes your grocery shopping habit?

	I shop for both myself and my family	I shop for myself	I shop for my family
Male	40.1%	50.2%	54.1%
Female	58.6%	46.8%	44.9%
< 19	8.6%	15.9%	5.9%
19-22	20.9%	33.9%	18.4%
23-26	23.3%	25.8%	17.8%
27-35	30.5%	17.2%	31.9%
36-45	11.7%	4.3%	20.0%
46-60	2.4%	0.9%	2.2%
> 60	0.1%	0.0%	0.0%
White collar	38.5%	33.5%	37.3%
Students	18.4%	36.5%	15.7%
Housewife/stay at home husband	15.1%	3.4%	18.4%
Self-employed	9.7%	7.7%	7.6%
Unemployed	5.8%	5.6%	4.3%
Blue collar	5.1%	5.6%	7.6%
Civil servant	2.2%	3.0%	3.2%
	100%	100%	100%

Source: [GoMart Feature Prioritization](#), August - October 2020,

How to fulfill “Competence” quadrant?

GoMart's heartland is in 'Efficiency'; the goal is to move to 'Competence'

Competence is a state of mind.

It's about balancing household needs & larger goals.

Competence

Most prevalent among

Primary: Married, with or without kids
Secondary: Single living with parents
25-40 years old, SEC AB,
professionals or homemakers

Occasions

Monthly essentials, Bi-weekly/weekly
restock

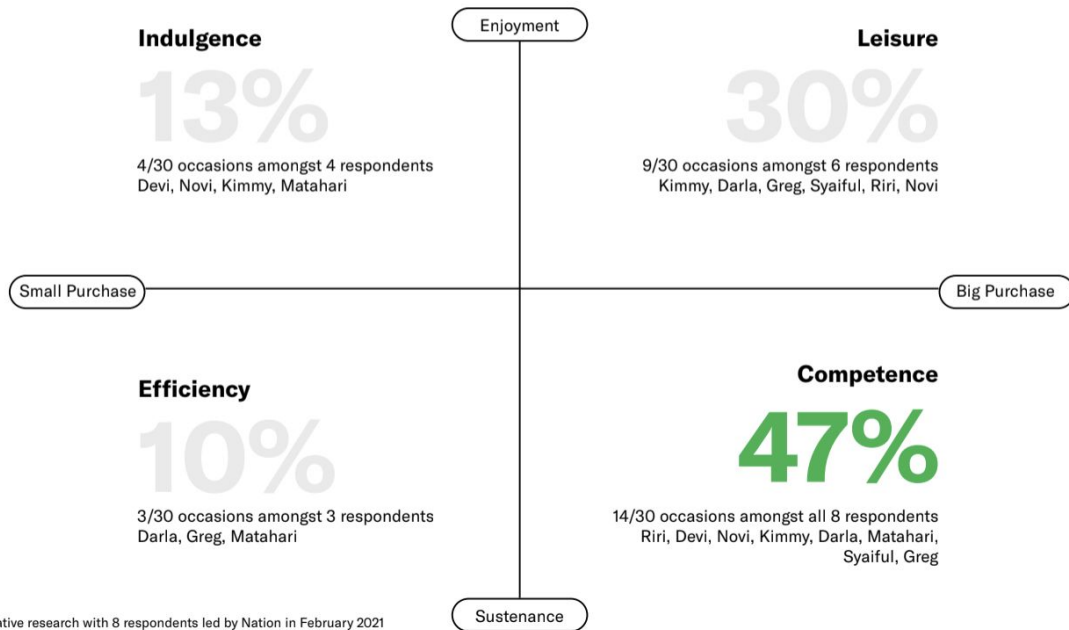

Mood

Responsible, focused, pressured

Goal

To feel competent

Based on qualitative research, we take a look of 30 grocery occasions that the consumers did during 1 week of observations, and Competence makes up for nearly half of grocery shopping occasions.

*Based on a qualitative research with 8 respondents led by Nation in February 2021

In Competence space, groceries are a mission to pursue larger goals

To achieve this mission, consumers need to be groceries masters

Smart, savvy, agile and knowledgeable enough to:

- Build the perfect shopping plan and execute it expertly
- Know where & how to get the right brands & most suitable products
- Find the best value
- Not miss out on any offers

Therefore, the role of the grocery shopping platform/store is to enable them to be this master

And achieving competence means winning at groceries (and at life!)

That deeply satisfying and proud feeling of using the tools & options you have in the smartest way, finding workarounds through inefficiencies

Getting the best product, from the right merchant, at the best price

Through the workshop exercise, we came up with Winning Proposition for GoMart

EFFORTLESS GROCERY SHOPPING

A platform that enables them to become a master at groceries and achieve their mission successfully. Helping consumers to shop in a breeze.

The Insight

Caring for my household demands time and effort. So when I shop for groceries, I plan perfectly so I can get it done efficiently.

But stores/platforms are messy, unintuitive, and full of friction. They don't help me streamline the process.

The Proposition

GoMart, you can't shortcut care, but you can shortcut groceries

Using data and the most intuitive product experience to streamline groceries so you can shop effortlessly.

The Benefit

Functional: Saving your time, energy, and headspace for what truly requires your personal touch.

Emotional: The freedom to care for your family.

Essential pillars we must build in order to tangibly deliver an effortless shopping experience

1 Autonomous platform

An intuitive and frictionless experience, requiring minimum steps to complete orders

Some Example:

- Shortcuts to discover and Search relevant products - *personalized recommendation*
- A frictionless cart experience from Add to Cart to Delivery - *EIM integration to reduce OOS case*
- Advanced tools to aid Smarter Shopping - *price/ product recommendations*
- Shopping list feature to make order/ re-order/ replenishment brainless

2 Effective Communication

Seamless shopper-consumer-driver communication and monitoring

Some Example:

- Minimal coordination during actual shopping time - *Pre-checkout presets for preferences, replacements, etc.*
- Effective communication to avoid several / lengthy notes - *e.g. Video call, send pictures*
- An informed shopper that can make personalized decisions/ recommendations - *e.g. Aiding shopper by providing replacement recommendations based on consumer's history, preferences*

3 Maximized Value

Getting the most for the least, while saving your time and effort

Some Example:

- Direct access to relevant promos
- Automatically redeem - auto applied promo during checkout
- Promos on bulk orders & refills - *E.g. Subscription plans, bulk promos*

How the competition delivers the Effortless Shopping Experience with the 3 pillars?

Happy Fresh

Taking inspiration from a strong player in the 'effortless' space

Basic /
Hygiene

Advance /
Unique

1 Autonomous platform

A frictionless experience throughout the entire shopping journey

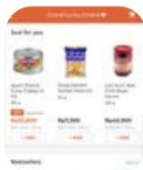

Auto-filled details

Checkout with just a few clicks

Delivery Options

Schedule at your convenience

Personalized shortcuts

Quick reorder, relevant product suggestions based on search & purchase history

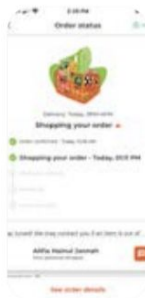

2 Effective & efficient communication

Minimizes communication through presetting preferences & advanced customization features

Customization preferences

Pre-set contact option and replacement preferences ahead of time

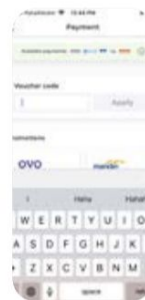

Live cart update and tracking

Oversee any changes to your bill and status of your orders, no chatting required

3 Maximized Value

Minimizes communication through presetting preferences & advanced customization features

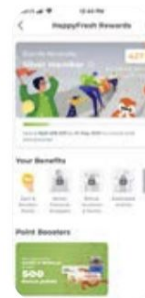

Vouchers

Manual-entry vouchers that does not always apply to your purchase

Quick Win

Borrow auto-applied voucher feature from GoFood

Membership program

Automatically earn rewards for your routine purchases

Quick Win

GoClub integration

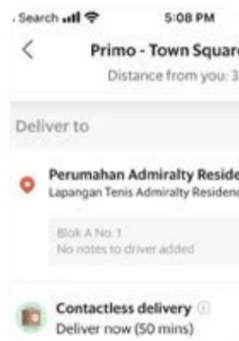

GrabMart

Hassle-free alternative to offline grocery shopping

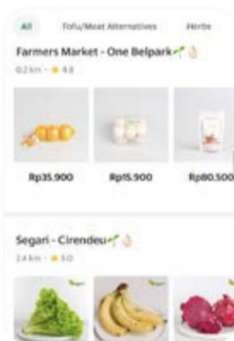

1 Autonomous platform

Has features that are a hygiene for a groceries platform, but quite advanced for on-demand

Auto-filled details

Checkout with just a few clicks

Detailed Categories and Listing

Extensive sub-categories with watermarked photos

Specify items easily

Add notes while adding items to cart

2 Effective & efficient communication

Provides various communication methods between driver-consumer

Various communication options

Direct call or in-app chat/ call/ exchange pictures

3 Maximized Value

Abundance of promos and an affordable delivery that feels worth it for small-medium purchases.

Promo Page and Exclusive Deals

Multi-merchant promo page, affordable delivery, manual vouchers

Quick Win

Borrow multi-merchant promo page and auto-applied voucher from GoFood

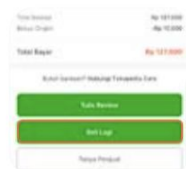

ShopeeMart, TokoMart

Streamlining search and the shopping cart experience

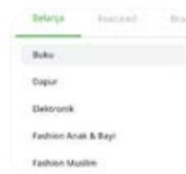

1 Autonomous platform

Streamlining search and the entire shopping cart experience

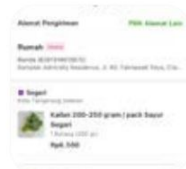

Re-order Button

Shortcut to repeat routine purchases

Advanced Search and Filter

Efficiently sift through an abundance of SKUs with less scrolls

Auto-filled Details

Checkout with just a few clicks

2 Effective & efficient communication

Effective resolution/ troubleshooting by getting your enquiry exactly to the right PIC

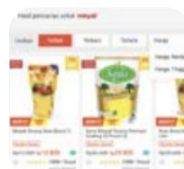

Designated Help Centres

Streamlined centres for specific inquiries questions, or issues

3 Maximized Value

Easily compare between products & access relevant deals

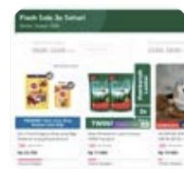

Compare and contrast tools

Visual comparison to help find the most relevant brand/ item/ price

Personalized promos

Automatically organizes your promos, vouchers based on eligibility and relevance

Curated deals

Discover promos that are only relevant to you

Effortless - what to look out for

*HMW: **Further refine the role of GoMart as “Effortless”**. What does it mean for GoMart to become an effortless online grocery platform?*

*HMW: **Define our hero products to tangibly cater to this space in short term and long term plan**. What existing products we must highlight, prioritize on the roadmap, or even create in order to achieve this vision?*

Insights from GoFood

Fatema

GoFood Home Page

[Read Report Here](#)

Problem Statement

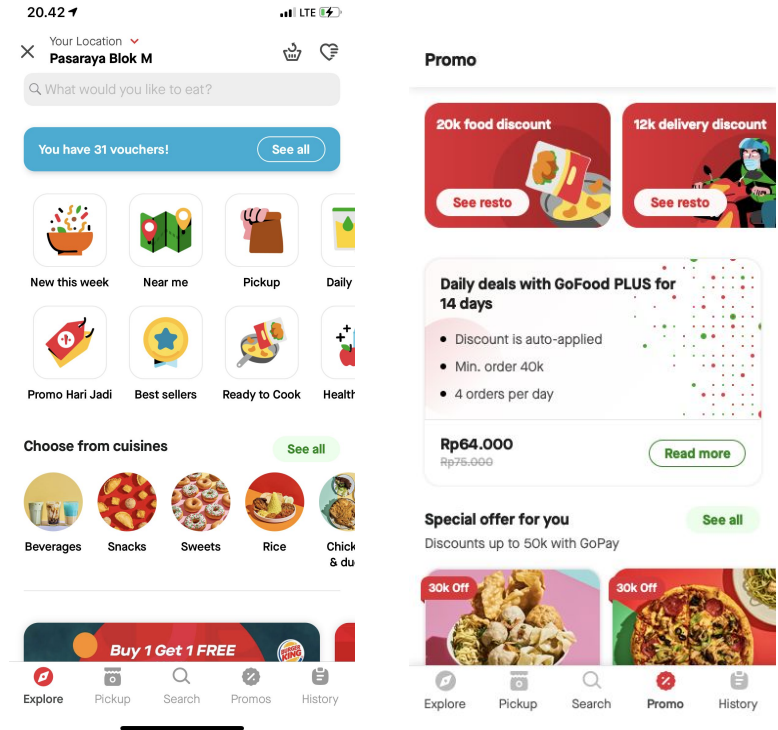

It was hard for users to discover what they were looking for, users came in with different intentions. The home page kept moving structure, bringing down predictability.

Solution

Bottom navigation covering the highest intents, stable structure for the shuffle cards on GoFood home.

Impact

- New GoFood Home time to booking is -3.69% (~18seconds) faster than Old GoFood Home
- New GoFood Home no. of clicks is 23.24% higher than Old GoFood Home
- 100% increase of reorder (history) page traffic from Nov - Dec'20 (~220k) to Feb - Mar'21 (~440k) 33.3%
- Increase of bookings made from reorder page, Nov - Dec'20 (~30k) to Feb - Mar'21 (~40k)

GoFood Promo Page

Problem Statement

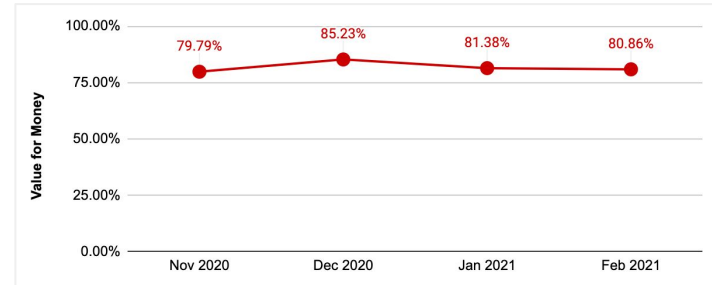

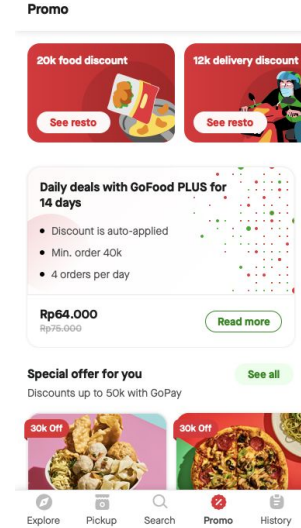

Promo discovery is hard, users feel GoFood doesn't give enough discounts.

Solution

Provide users a one stop stop for all discounts and promos, through bottom navigation.

Impact to CSAT

Significant increase for **Value For Money** attribute, starting from a month after the rollout of Navigation Bar on 13th Nov 2020. Then remains stable until February 2021.

20 mins

Share back + Discussion. Get into the mindset of the customer.

Bridge to thinking about the first time discovery of GoMart and defining questions to be answered. What are some key HMW Questions that came up? What are some initial assumptions we have?

Some example Key Questions + Assumptions.

Input to refine our initial Design Challenge **HMW Create a better discovery experience for people who initially want a few items?**

- **Example: Understanding of the Customer intent, the specific mindset – why are they here, what do they need?** What are some of the key challenges, questions that came up? What are some of the underlying assumptions about understanding what people want?
 - What are top items people want to buy? Staples?
 - Ad hoc, routine and Unplanned
 - Convenience, Promo, Curiosity
- **Example: Something around Navigation and Discovery.** How do people navigate to what they need? Do people navigate by store or by food product? What are these dimensions of discovery – cheap, fast or high quality? What matters most? What are our assumptions here? Where do people drop off? Why? What are our assumptions here?

What's next?

Session 1: – Understand The Problem

Studio: Focus on key questions – reframe these in terms of consumer needs, value, best practices for success). Will synthesize outcomes of Session 1 and share back with the team

Session 2: Define The Questions We Most Want To Answer

Studio: Design work to turn ideas for alternatives into sketches/mocks

Session 3: Design Experiments To Answer Key Questions

Planning for experimentation: roadmap, timeline, target date for follow-up check point for interpreting the experiments (driven by research)
